

# **Leadership of Comrade Kim Il Sung for Building Up Powerful National Defence Capabilities**

Eleazar Rubio Aldaran  
Secretary General, Latin American Institute of the Juche Idea

The DPRK people have become a powerful and prosperous nation thanks to the distinguished military idea of the great leader Comrade Kim Il Sung and his wise leadership.

One of the exploits performed by Comrade Kim Il Sung is that he liberated the Korean people from the oppression of the Japanese imperialism.

Comrade Kim Il Sung dealt a telling blow to the US imperialism for the first time in world history. The then world strongest US imperialism was unable to reduce the Korean people to submission in the Korean war.

The US Army general Mark Clark, who was present at the ceremony of signing the Korean Armistice Agreement, confessed in his reminiscences that he was dishonored to sign the armistice agreement without victory for the first time in the US history.

The Korean people demonstrated to the world that one is unconquerable when one struggles for independence with one's destiny in one's hands.

The great achievement made by Comrade Kim Il Sung in rehabilitation is admirable, too. Mark Clark himself was confident that north Korea would not rise from debris even in 100 years. However, the DPRK completed the rehabilitation in mere 3 years and brought about a revolutionary upsurge, thus turning the country into a true socialist industrial state in a short period of 14 years.

Under the leadership of the Workers' Party of Korea, the DPRK freed itself from exploitation and oppression, backwardness and poverty and become dignified, independent and self-defensive socialist power, a people-centred socialist paradise.

Comrade Kim Il Sung was not only the great leader but the distinguished thinker in the 20th century. It is because no one thought about the creation of the Juche idea.

The DPRK has built up her powerful national defence capability by fully applying in the military field the Juche idea authored by Comrade Kim Il Sung.

In this connection, we should not forget the self-determination and dignity of General Secretary Kim Jong Un shown to ex-US President Donald Trump who stepped on the DPRK. This event shows that the DPRK has made big progress in safeguarding the nation. The DPRK has never kneeled before the imperialists during all the past historical periods.

The DPRK's immense defence capability against the attack from the imperialist countries was further bolstered up by applying the Songun politics, the military-first politics, which reflected the faith to safeguard the Korean nation. The DPRK is possessed of such nuclear weapons as A-bomb and H-bomb. General Secretary Kim Jong Un expressed his determination to increase military potentials of the DPRK with the view of ensuring defence and protection to cope with any external threat. As long as US imperialism exists, the DPRK will never weaken its military strength.

It has been nearly two years since the spread of COVID-19. Nonetheless, the DPRK people have strengthened and developed their public health system to cope with it. This is inconceivable without the DPRK's independent and prospering economic development.

We have been following and disseminating the instructions of President Kim Il Sung, General Secretary Kim Jong Il and General Secretary Kim Jong Un in Mexico for over 15 years. We concentrate our major efforts on holding meetings, forums and gatherings to study and disseminate the Juche idea. On these occasions, in particular, we are going to make our comrades conscious by making joint efforts to free them from conservatives at home and oppressive forces abroad.

In addition, we are faced with the duty to reveal clearly the falsehood of propaganda that the West spreads against our brothers.

We also continue to disseminate in Mexico the exploits of President Kim Il Sung, General Secretary Kim Jong Un and achievements of the DPRK people.

Today we need more than ever before the unity and solidarity between the peoples of the two countries and cooperation with the fraternal DPRK people. The era of peace and friendship has come.

President Kim Il Sung taught us that the unyielding struggle to realize the world peace is the main task of the peoples in all countries.

All people keep in their minds these instructions about self-determination and defence that is maintained by the DPRK people.

People in all countries of the world aspire after the building of socialism.
