

Effect of Juche Idea in Africa and World

Aggée-Courtois LUNDULA LUNDULA,

Chairman, Juche Idea Study Group in Kisenso, DR Congo

The great and brilliant Juche idea, which was authored by the great President Kim Il Sung, applied by the great Leader Kim Jong Il in his whole life and detailed by Marshal Kim Jong Un who adds brilliance to the DPRK ever more than before, is one of the great treasures of the world that spreads widely in the world and proves its effect.

Realities proved by the Juche idea give answers to the problems arising in the world. The Juche idea is effective in any society and can transform Africa and the world.

The Juche idea is divided into the philosophical principle, the socio-historical principles and the guiding principles. Applying these three principles is an important process of proving effectiveness of the great Juche idea in transforming Africa and the world.

President Kim Il Sung said that one is master of one's own destiny and has strength to shape it. According to the Juche idea that views that man should be aware of what kind of being he is and that he has capacity and essential attributes capable of shaping his own destiny and reshaping the world, it is the first indispensably necessary condition to realize that man is master of his own destiny and has strength to shape it if he is to be a factor of social development free from all kinds of domination and passiveness. The Juche idea is also effective as it has everything, both in spirit and context, needed in encouraging man to have such sense of consciousness and go into action.

Meanwhile, the socio-historical principles enable to have correct understanding of the present times by considering experiences of the past history and back up the fact that all revolutions and developments are made by the people. It is essential to be well aware of this in order to make all actions done by the people and for the people by disseminating and realizing these principles among them. It is another effectiveness the Juche idea has in the world, particularly in Africa where the genuine strength that enables to make social progress, in other words, the people's strength is underestimated or neglected by "power leader".

As shown by the case in the DPRK, the guiding principles are also important. The principles regard liberty and independence, development and sovereignty as their purpose. If the principles are applied, every society can have undeniable independence, stability and efflorescence.

What's clear is that man's independent consciousness and creative ability should be enhanced to make man a powerful being in order to develop the society, and we proved that the Juche idea has everything for the development of the society. The Juche idea can enhance man's independent consciousness and creative ability. The Juche idea becomes a prop for the whole world, particularly for Africa to rely on to survive. It is because that the current world, where inequality, injustice and oppression prevail, cannot exist for long.

Hatred, vulgarity, avarice, egoism, individualism and dependence on power get more violent than ever.

The Juche idea is the most powerful fortress that disturbs hegemony with its every necessary factor.

Meanwhile, the world requires the Juche idea. The world is under change. Aspiration for a new era becomes strong on a world-wide scale. In the world where capitalism and its puppets disappear, it is necessary to struggle for fairness, justice and stability. "Down with degraded and disgraceful imperialism!" is heard from everywhere in different ways. We cannot leave imperialism as it is any more. Only then, can we say that it is the era when the great and brilliant Juche idea achieves victory.

It is urgent for mankind to apply other philosophy because mankind resorted to the imperialist and totalitarian method that was unfavourable for the people concerned, produced thrilling results in the world and especially in Africa and experienced failure.

If we want our mankind to exist and find out meaning of its life, if we want to save the world and weak human beings who live in it and, as Patrice-Emery LUMUMBA appealed, if we want Africa which suffered much to write its history, the brilliant and great Juche idea will be a suitable answer for us. Results are produced in Africa and every part of the world where the Juche idea is applied. Whenever we apply the Juche idea, we will be more independent, more developed and more sovereign.

The current situation of Africa and the whole world requires to apply firmly the Juche idea, a driving force that transforms the society and annihilates degeneration, plunder, exploitation and brutal oppression which imperialism appreciates highly.

That is why the Juche idea adherents in the world should lavish labor on disseminating among the people the brilliant, great and innovative Juche idea that leads and will lead Africa and the world to independence, so that they can have a correct attitude toward the struggle and cause for a changed Africa and world.
