

# **DPRK Is State Which Realized Its People's Long-cherished Desire for Independence and Social Justice**

**Dmitri Kostenko,**

Chairman, Russian Association for the Study of the Juche Idea

Comrade Kim Il Sung founded the Democratic People's Republic of Korea, the first socialist state in Korea, on September 9, 75years ago. The DPRK is the only state that represents the entire Korean nation by law and succeeds to the great 5 000-year history of Korea.

The 75-year history of the DPRK is filled with great changes and brilliant victories. During the period the Democratic People's Korea overcame all complex and complicated challenges of our times under the leadership of Comrade Kim Il Sung and Comrade Kim Jong Il and has been turned from a backward dependent country into a modern powerful socialist country with invincible strength.

The immortal Juche idea, which the ruling Party of the DPRK and all its people considered as their guideline, enables them to contribute big to successfully developing the country, registering achievements and safeguarding independence from the imperialist infringement. The Juche-oriented view on the world enabled the DPRK to build an independent economy, enforce independent policies in the international arena and be faithful to the ideal of the Korean revolution. It also enabled to establish an effective and self-reliant defence system, thus turning the DPRK into a strong fortress equipped with modern missiles and nuclear weapons, an invincible bulwark of socialism that can repulse every move of the imperialist aggression.

For 75 years since its founding, the country has been built into an energetic and prosperous socialist power that has strong military and economic potentials.

The DPRK fully realized both the people's desire for complete sovereignty and independence and their desire to live in a society based on social justice where all its members can be deservedly appreciated for their work done with possibilities to foster their abilities. In other words, the country didn't become a plaything of politicians who stay on the other side of the ocean, but instead its social evolution is made in accordance not with interests of a handful of privileged idlers but with those of the broad working people.

I can say with firm belief that the founding of the DPRK is an event of the world

history that brilliantly realized the Korean people's long-cherished desire for the founding of a genuine independent state that serves the working people.

At present the DPRK stands against imperialism with success while maintaining the line of safeguarding the cause of independence and supports Russia that is fighting against the Ukrainian fascists, the stooges of the US and European imperialists. Hence, the patriots in Russia are heartily and sincerely pleased with successes achieved by our brothers in the DPRK and fully support the line of independence against imperialism enforced by Marshal Kim Jong Un. For the Russian people, the DPRK is a friendly neighboring country in which a genuine socialism, a socialism of Juche type, a man-centred society has been built.

As a peculiar socialist state, socialist Korea is a brilliant model that realizes the ideals of the society where the Juche-oriented principle of unity of the leader, the Party and the people is applied.

The DPRK now advances vigorously along the road started by Comrade Kim Il Sung and Comrade Kim Jong Il winning victory after victory under the leadership of Marshal Kim Jong Un and becomes an inspiring model of all people in the world.
